

Problem Statement:

Company wants you to publish a report on Tableau Online and create users with explorer and viewer accounts.

Refer the dataset: Superstore USA

Q1: Create a user account with the email id EMAIL ID 1 and EMAIL ID 2 and give user 1 as explorer access and user 2 as viewer access.

Q2: User 1 is a manager of Central region; he should only get access to Central region's data.

Q3: User 2 is a higher management and he should have access to all the locations.
